## Glass & Mirror Craft Float Glass like you've never seen it before!

Glass & Mirror Craft presents, GAMC Colors; a collection of painted glass. Reflect luminosity and radiance in your design by utilizing GAMC's standards, offering 24 standard opaque colors. All GAMC Colors are offered on Low Iron glass for the most accurate and consistent color. Low Iron reduces the greenish hue that basic Clear glass emits, allowing uninterrupted brilliance.

Don't see the color your looking for? No worries! Glass & Mirror Craft can custom match any color of your choice. Just reference any paint chip or pantone color and our specialty department will match it.

Please note the swatches above are a digital representation. For the most accurate color match, please contact your sales representative for a sample utilizing your projects thickness of glass. Color shifts will occur between thicknesses of glass.

## Standard Frit Colors

Glass & Mirror Craft Float Glass like you've never seen it before!

Glass & Mirror Craft presents, a collection of frit glass. Reflect luminosity and radiance in your design by utilizing GAMC's standards, offering 17 standard opaque colors in many standard or custom pattern options up to 90% coverage.

Don't see the color your looking for? No worries! Glass & Mirror Craft can custom match any color of your choice. Just reference any paint chip or pantone color and our specialty department will match it.

Please note the swatches above are a digital representation. For the most accurate color match, please contact your sales representative for a sample utilizing your projects thickness of glass. Color shifts will occur between thicknesses of glass.

- GAMC offers Ceramic Enamels which possess unrivaled durability and color fastness. These ceramic enamels are based on high performance ceramic materials.
- True lightfastness ensures that there is no visible difference between old glass and new glass
- Ceramic enamels are fused onto the surface of the glass itself; they will not delaminate, blister or crack.
- Ultimate chemical resistance that will not fade, stain or discolor upon contact with glazing compounds, sealants or gasketing materials.
- Ceramic enamels won't scratch or mar during fabrication or installation.
- Fired-on ceramic enamels are non-toxic, non-combustible and easy to dispose.
- Exceptional green strength produces maximum yields and minimal scrap - all with unparalleled ease of handling.
- GAMC offers a full line of standard and custom Ceramic Enamels designed to meet requirements outlined in ASTM C 1048.
